

## “Global Entrepreneurship Enhancement Program”, On-site Training in the United States

A total of 32 participants took part in the “2023 Global Entrepreneurship Enhancement Program,” led by our university’s LINC 3.0 group. Among them, 29 students were selected for the Growth Track, comprising eight teams, while the remaining three students were selected for the Education Track.

The program participants underwent orientation and pre-education in Korea, and then they split into two groups for the main training in the United States. The first group of 16 students, guided by Prof. Song Sung-il (Director of LINC3.0 Business Support Center), received entrepreneurship training at Hanseo University’s Startup Center in Long Beach, California, from July 17 to 28. The second group of 16 students, under the guidance of Prof. Kim Hong-han (Director of LINC3.0 Employment and Entrepreneurship Support Center), underwent training from August 13 to 24 at

Global Entrepreneurship Enhancement Program orientation and pre-education

the same location.

During the program, the students gained insights into global entrepreneurship trends and developed their own entrepreneurial skills by benchmarking various business models through training by local experts. The main focus of the entrepreneurship training was to prepare marketing strategies for their startup ideas to enter the global market. The program included workshops that emphasized team-based planning using design thinking and brainstorming techniques, market research, and persona marketing. Toward the end, the students conducted consumer interviews

Special Lecture delivered by Silicon Beach Startup "WEVER" expert

and product usability validation in Los Angeles, producing videos and presenting their findings to receive feedback from local experts.

The primary goal of the program, initiated by our university’s LINC3.0 group, is to expand the students’ startup ecosystem to a global level. Every year, the LINC3.0 group actively supports students who possess excellent technology and intend to expand overseas. The “2023 Global Entrepreneurship Enhancement Program” serves as a prime example of this support. The LINC3.0 group also

Meetings held to establish marketing strategies through brainstorming

Completion ceremony of the Global Entrepreneurship Program

plans to provide additional funding for prototype development, marketing support, and other expenses to facilitate the actual commercialization of the outstanding startup ideas recognized in this program.

## Grad. of Paraguayan Air Maintenance Trainees

The graduation ceremony of Paraguayan aircraft maintenance training instructors from Hanseo University took place on August 21 at the Taean Campus conference room.

The graduation ceremony, presented Director Kim Cheon-yong of the Aviation Technical Education Center, included a

progress report by Prof. Choi Se-jong, the presentation of education completion certificates (certified by the South Korean Ministry of Land, Infrastructure and Transport) to the graduates by President Dr. Ham, and congratulatory speeches.

In his speech, President Dr. Ham expressed his hopes for the graduates to contribute as skilled maintenance

personnel to the development of the South American country's aviation industry by applying the knowledge they gained from studying at Hanseo University's Aviation Technical Education Center. He also highlighted the role they could play in fostering friendly relations between the two countries.

The training, which took place from June 23 to August 21 for a total of 60 days, consisted of six modules, including basic aircraft maintenance practical training and cargo aircraft systems. The program also featured cultural exploration activities such as visits to major domestic airlines and aircraft

manufacturers including Korean Air, Korea Aerospace Industries, and other aircraft production and maintenance companies. Additionally, cultural visits to sites like Gyeongbokgung Palace, Bulguksa Temple, and the DMZ were conducted to enhance understanding of Korean culture.

Hanseo University hosted the foreign trainees as part of the first-ever aviation maintenance education program for foreign participants by a South Korean aviation technology institute. This initiative aims to strengthen the university's foundation as a global institution.

# Hanseo Univ. Confers Honorary Doctoral Degree to Chairman Ham of Hana Financial Group

President Dr. Ham conferring an honorary doctoral degree upon Chairman Ham Young-joo (left)

Commemorative photo of participants at the honorary doctoral degree conferment ceremony (International Conference Hall).

On June 2, our university awarded an honorary doctoral degree in Business Administration to Chairman Ham Young-joo of Hana Financial Group. The degree conferment ceremony took place at the main International Conference Hall, attended by around 100 guests, including President Dr. Ham Ki-sun, key faculty members, Hana Financial Group employees, and National Assemblyman Sung Il-jong. The ceremony proceeded with a recommendation speech by Dean of Graduate School Ham Jung-hyun, degree conferral and welcome speech by President Dr. Ham, congratulatory speeches by Assemblyman Sung Il-Jong and Hana Bank President Lee Seung-lyul, and a response from Chairman Ham of Hana Financial Group. Chairman Ham, born in 1956 in Buyeo, South Chungcheon Province, graduated from Ganggyeong Commercial High School and joined Seoul Bank in 1980. After studying accounting at Dankook University as a night student, he obtained his bachelor's degree in 1985. He went on to hold various important positions within Hana Bank and became the inaugural CEO of KEB-Hana Bank when Hana Bank and Korea Exchange Bank were merged in 2015. The following year, he was appointed to the Vice Chairman of Hana Financial Group, and in 2022, he became the Chairman.

Chairman Ham, who achieved a success story through unwavering determination in the challenging and uncertain global financial environment, has been recognized for adopting ESG management earlier than any other financial groups in Korea, which is considered a global best practice. He is known for caring for the welfare of the bank's employees and even providing support for disaster relief efforts, such as the restoration project for the areas affected by wildfires on the East Coast last year, reflecting his commitment to ethical management and social contributions. During his acceptance speech, Chairman Ham Young-joo expressed his delight and pride in receiving an honorary doctoral degree from Hanseo University, which he praised for becoming a leading educational institution in the aerospace field, foreseeing the future. He also stated that he will further expand win-win finance for the people suffering from high-interest rates, seeing it as an encouragement to fulfill the mission of a financial professional bestowed by society. On this occasion, President Ham honored Chairman Ham's wife, Kim Yeon-gil, with the "Jami Award for Virtuous Spouse" to recognize her hidden contributions to her husband's success.

# President Dr. Ham Signs Exchange Agreements with Two Universities in Sichuan, China

President Dr. Ham Ki-sun, along with Kim Jin-woo, Vice-President of External Affairs, and Yum Jun-young, Dean of External Affairs, visited Sichuan Province, China, from June 28 to July 1 to sign cooperation agreements with local universities for academic exchanges and dispatching exchange students. This MOU was signed in collaboration with South Chungcheong Province Governor Kim Tae-heum's delegation, aiming to establish a multi-faceted cooperation relationship with China, including investment enlistment, education, environment, and sports. On June 30, a ceremony was held in Chengdu, Sichuan Province, to commemorate the fifth anniversary of the sisterhood relationship between South Chungcheong Province and Sichuan Province. During the ceremony, Hanseo University and Sichuan Agricultural

University signed a cooperation agreement in the field of education. Both universities pledged to cooperate in mutual visits and exchanges of faculty members and students, joint research, and fostering talent. Sichuan Agricultural University was selected as one of the 40 key universities supported by China's national development plan in 2005. President Dr. Ham and the delegation also visited Sichuan Vocational Transportation and Technical College, an affiliated public higher education institution under the Sichuan Provincial Ministry of Transportation. They signed a cooperation agreement with President Jiang Yonglin, discussing academic exchanges in fields such as art and design, aviation, and health, as well as student transfers.

The presidents of Hanseo University and Sichuan Agricultural University are exchanging an agreement.

# 45 Hanseo Students Pass Recruitment Process at INSPIRE Entertainment Resort

Our university has 45 students who made it to the final list of newly hired employees for the first half of 2023 announced by the Mohegan INSPIRE Entertainment Resort, the largest domestic complex resort in Incheon International Airport's international business complex.

The latest hiring holds significant meaning in terms of sustainability as it reflects the "College Partnership Program," one of the clauses in the business agreement signed between our university and INSPIRE on March 17 this year, actively incorporating graduates recommended by Hanseo University professors into their recruitment process. The departments eligible for this program include the Department of Hotel, Casino & Tourism, as well as the departments of Leisure Maritime & Marine Sports, Air Tourism and Services, and Multidisciplinary Design. Notably, the Department of Hotel, Casino & Tourism, which produced 33 successful candidates for the casino

segment this time, has proven itself as the top domestic department specializing in the resort education curriculum. Prof. Choi Eun-mi from the department said, "The competence of students built through the specialized resort industry education program led to excellent results."

INSPIRE Entertainment Resort is a domestic company established with 100% investment from Mohegan, a leading resort master developer and operator in the United

States. It is preparing for its opening in the second half of 2023 and will feature facilities such as a foreigner-only casino, a five-star hotel with over 1,200 guestrooms, a 15,000-seat arena for multi-purpose performances, a retail space combining convention centers and entertainment, an indoor water park available throughout the year, and an outdoor themed attraction area.

## Business Agreement with Chungnam Office of Education to Support Afterschool Programs

Commemorative photo with the 11 university presidents participating in the agreement

Vice Superintendent Kim Il-Su(left) and President Dr. Ham Ki-sun signing the Haebom School agreement

Our university signed a business agreement with the South Chungcheong Office of Education on August 9 for the "Chungnam-style Afterschool Program" (Haebom School) support. This agreement was signed at Cheonan Buldang Elementary School and involved 11 universities, including Gongju National University of Education, Sangmyung University, Hoseo University, Sun Moon University, Kongju National University, Konyang University, Hyejeon College, Cheonan Yonam College, Shinsung University, and Korea Nazarene University, as well as our university.

This agreement was established with the purpose of enhancing the practicality of the "Afterschool Program," organized by the Chungnam Office of Education as a national project to expand full-day elementary education

(extending daycare programs until 8 pm) and involving universities in the process.

The main provisions of the agreement, signed by the presidents of the 11 participating universities, including our university's President Dr. Ham Ki-sun, and Kim Ji-chul, the superintendent of Chungnam Office of Education, encompass three major aspects: exchange of human and material resources for the promotion of "Haebom School"; support for excellent educational programs of universities, including digital (AI, software, etc.), culture, arts, and sports; and sharing of knowledge and information possessed by the institutions for making the Haebom School policy more substantial. Details regarding these aspects will be determined through separate consultations.

Following the signing ceremony, the participants

observed daycare classrooms and after-school programs at Buldang Elementary School and held a meeting with Minister Lee Ju-ho from the Ministry of Education.

Meanwhile, our university has tasked the Lifelong Education Center with promoting the Haebom School project and has established a task force led by the Dean of the Graduate School to facilitate more efficient implementation.

Our university plans to specialize in five areas for the Haebom School program, utilizing its own specialized education infrastructure, including aerial drones, survival swimming (utilizing the Marine Sports Education Center), character education (using the Presidential Archives), AI and future aviation (space experience), and language (after-school English).

<Campus Tour>

# Hanseo Regional Cooperation Center, Hub of Balanced Development in Local Community

*f most of the important elements related to politics, economy, society, and culture are concentrated in the capital region, the entire country cannot achieve balanced development. The fact that talents nurtured in local universities are also being concentrated in the capital is also an example of this imbalance in development. The reason why government agencies, including the Ministry of Education, encourage and support local universities, local governments, and regional businesses to create networks and become the driving force of innovation together lies here. We will hear from Prof. Ahn Sung-man, Chief Director of Talent Development Headquarters' Regional Cooperation Center, about how our university is playing a central role in building close networks within the local community.*

Student Supporters' volunteer service at the Taeon County Chrysanthemum Festival in Fall 2022

## 1 Please explain how the Regional Cooperation Center was established in our university.

The Korean Council for University Education held the “2023 Summer University Presidents’ Seminar” on June 29 at Paradise Hotel Busan, with the theme of “Outlook and Challenges of University-Local Government Cooperation.” On this day, 134 university presidents from across the country gathered for lively presentations and discussions. Just like this, the most important topic in academia today is the “cooperation between local governments, industries, and universities.” Currently, the central government is promoting large-scale national projects such as “Regional Innovation System & Education” (RISE) and “Glocal University 30,” all of which assess the capabilities of universities in promoting collaborative partnerships with businesses and local governments. Naturally, our university also needs thorough strategies in response to this. Since 2017, our university has implemented the Ministry of Education’s national projects like

LINC+ and, from last year, LINC 3.0. As one of the organizations driving such collaborations between local governments, industries, and universities, our university established the Regional Cooperation Center within the Talent Development Headquarters on September 1, 2019, as part of the HS Innovation Support Project. The purpose of establishing the center was to remain committed to our university’s social role through contributions to the local community and to support effective collaboration projects with local governments and community organizations.

## 2 With what institutions and networks does the Regional Cooperation Center collaborate in the local community?

Our university’s Regional Cooperation Center is building extensive networks with various social organizations, industries, and local governments in the regions where our main campus is located in Seosan City and our Taeon Campus in Taeon County, South Chungcheong Province. To be more specific, the center has established

close relationships with institutions such as South Chungcheong Province, Seosan City, Taeon County, Seosan City Council, Education Support Offices in South Chungcheong Province (Seosan, Taeon, Boryeong, Dangjin), Taeon Coastal National Park Service, Volunteer Centers in Seosan City, Taeon County, and Dangjin City, Sustainable Development Councils in Seosan City and Taeon County, Seosan City Chamber of Commerce, Seosan City Urban Regeneration Support Center, Chungnam Social Innovation Center, Chungnam Institute of Industry-University Convergence, and local children’s centers. In addition, local media outlets such as Seosan Times, Seosan Era, and CTN Newspaper have also been collaborating with our Regional Cooperation Center, providing significant assistance in planning and promoting various projects for the development of the local community.

## 3 What are the main activities of the Regional Cooperation Center since its establishment?

Our university's Regional Cooperation Center has been collaborating with local governments and community organizations to pursue various projects regularly each year. Let me introduce some of the important projects: The center supported the Taeon County Chrysanthemum Festival. Last fall, 65 volunteer participants engaged in preparing chrysanthemum cultivation and providing loading and unloading services for the festival. In May of this year, 25 participants volunteered for the Children’s Day event in Taeon County, taking charge of the entire event. In 2022, the center’s head and a student

Inauguration ceremony of the 2nd cohort of Regional Cooperation Student Supporters (April 13, 2022)

<Campus Tour>

**Dental Hygiene Student Supporters conducting oral health education at the local children's center**

representative received a plaque of appreciation from the Taean County Council on the Volunteer Day for Taean County volunteers. The center also runs the Environmental Education Coordination Committee in collaboration with the Taean Education Support Office. Since last year, the committee has carried out the “Let's pick up together” campaign for beach cleanup in commemoration of “Ocean Day” on the last week of May. This year, the campaign, which fell on June 3, involved 350 participants from 12 organizations, including our university, Taean County Office, Taean Education Support Office, Korea Western Power, Agricultural Technology Center, Korea Federation for Environmental Movements (Taean Chapter), Oil Spill Restoration Memorial, Chollipo Arboretum, Taean Coastal National Park Service Office, Taean County Sustainable Development Council, Garolim Bay Ecotourism Council, and Citizens Council for Taean Ecosystem. The center has signed a partnership agreement with the Taean Coastal National Park Service and adopted Mageompo Beach for continuous supervision. The two institutions have built a close collaborative relationship while jointly operating ongoing coastal environment improvement projects, including helping students obtain marine safety certifications and participate in on-site safety training. The center supports projects that contribute to the development of the local economy while enhancing students’ academic capabilities. For example, in collaboration with the Seosan, Taean, and Dangjin Education Support Offices, the center initiated drone education for local students. Over the past three years, more than 2,000 elementary, middle, and high school students have benefited from drone education provided by our university’s Unmanned Aircraft Systems students. In the second semester of this year, the same program will be offered to local students. The center also supported Taean Education Support Office’s drone soccer tournament in 2021. Additionally, the center provides design support to local small business owners such as merchants in Haemi Market in Seosan, Seosan Agricultural Specialty Item Promotion Group, Seosan 4H Youth Farmers, Seosan Dongbu Market Merchants

Association, and Haemi Eupseong Direct Sellers Association. Design students and mentor professors are playing an important role in providing design assistance to small business owners in need.

Furthermore, the center has launched a university student volunteer support team that works in collaboration with the Seosan Volunteer Center to organize and carry out volunteer services needed in the region. In 2022, 43 participants from our university supported the Seosan Tteumbugi Marathon National Competition, including cleaning up the event venue afterward. Recently, two student support teams from our Regional Cooperation Center took part in the garlic packaging event at the Seosan Garlic Festival and contributed to the 600-meter Udo mural and calligraphy support to pass the feasibility study for Garolim Bay. Our center has signed a partnership agreement with the Seosan City Welfare Center to promote welfare for disabled individuals in Seosan City and is engaged in social service activities.

## 4 What are the main tasks of the Regional Cooperation Center for the future for its development?

We believe that our university’s “Regional Cooperation Student Supporters” are spreading a positive image of our university in the local community while engaging in various activities to address local issues. Our center has been operating the Student Supporters’ program since 2021, and it is currently in its fourth semester. The Student Supporters are divided into five teams: Volunteer Contribution Support Teams 1 and 2, Marketing Support Teams 1 and 2, and Design Support Team 1. They plan and execute diverse activities while communicating with various institutions and organizations in the local community. This is an activity where students independently identify and solve local issues. Through collaboration and communication with local governments and social organizations, they work together to solve problems and enhance students’ academic capabilities, making it an immensely educational program. The Regional

**Student Supporters from Hanseo University assisting in the design of traditional market revitalization event (November 2021)**

Cooperation Center will further enhance the activities of the Student Supporters and establish more robust networks with local governments. We will identify projects that allow students to participate in resolving local issues, providing opportunities for them to strengthen their learning capabilities. Furthermore, we plan to transform their activities into opportunities that enhance their competitiveness in employment and business startup.

Currently, some of our university’s professors are actively involved in securing external projects and personnel recommendation as committee members, on recommendation of the South Chungcheong Province Council and Seosan City Council. We will make efforts to strengthen networks with local governments such as Seosan City and Taean County, enabling our professors to participate in various aspects, including assessment and evaluation committees for political, economic, cultural, and social projects. Moreover, we aim to establish networks with local community businesses to provide students with more on-the-job training opportunities and enhance their employment prospects. Student participation is crucial as it contributes to the co-prosperity and development of the local community, thereby elevating the status of our university. We kindly request the high interest and cooperation of our faculty and staff in supporting the Regional Cooperation Center, as it will yield positive outcomes for our university and students through a strengthened local cooperation system.

Thank you!

# The Success Story of Hanseo Alumni Father and Son

**W**on Chi-gwon, a senior in the Department of Leisure Maritime & Marine Sports at our university, is widely known as one of the top paragliding players throughout Asia. In 2019, he became the youngest champion in the long-distance category at the Korean Championship and also grabbed the first spot in the West Java (Indonesia) Paragliding Open individual competition. In addition, he achieved the first position in the overall ranking of the 2021 Paragliding Korea League, and in the 2022 World Cup in Romania, he finished 8th in the Individual event. In 2023, he secured the top position in the Asia-Oceania ranking and claimed the first place in the individual league of the 2023 Paragliding Korea League first round. Moreover, he was selected as a national team member for the French World Championships.

A commemorative photo of father and son at the opening ceremony of the 2010 Chuncheon World Leisure Games

**W**on started his paragliding career through the guidance of his father, Won Yong-muk, who is not only a renowned paraglider but also a leader in the field. He achieved various accolades, including winning the gold medal in the precision landing category at the 2001 President's Cup Paragliding event. He also claimed the top position in the national team member selection league in 2002 and received the prestigious Federation of Korea Aeronautics Best Player Award in 2003. Recently, Won Senior made a comeback to active sports, and in June of this year, he displayed his strength by winning the Korean Paragliding Championship held at Mungyeong Flying Land, marking his victory after a hiatus of 20 years. The father, having graduated from Hanseo

University's Graduate School of Aviation Information Industry, has become a proud paragliding player associated with his alma mater, Hanseo University, alongside his son.

When Chi-gwon turned nine years old, he had his first tandem flight with his father, and he describes the feeling of soaring through the sky as indescribably mystical and liberating. He made a promise to himself at that time that he would try paragliding solo, and he began his actual paragliding flights at the age of 12. He devoted most of his weekends and vacations to this sport. His inherent talent inherited from his father and relentless efforts led him to become one of Korea's top paragliding players. Initially, paragliding was just a hobby he enjoyed, but as he gained more skills, he naturally developed goals and ambitions. He started participating in various competitions held all over the world, which fueled his desire for better results. He now views paragliding as more than just a simple competition; it holds a deeper meaning for him.

Chi-gwon explains, "Paragliding consists of two main categories. My

primary discipline is the cross-country competition, where the race course is determined according to the weather conditions of the day, and about 100 participants compete to reach the goal point by utilizing the updrafts. The other category is precision landing, which focuses on landing accurately. Participants aim to land as close to the target as possible, and the distance is measured in centimeters."

For him, participating in competitions is not just about the thrill of competition itself but also about the driving force behind his life. It provides him with an unparalleled sense of accomplishment and a way to experience the vastness of nature while flying through the skies. Paragliding has become an essential source of energy and vitality in his life, and he cannot imagine his life without it. The competition in Taiwan, which Chi-gwon participated in with his father, holds a very significant memory for him. In 2018, his father secured the first position in the competition, and the following year, Chi-gwon himself claimed the top spot in the same event. After taking a break from active competitions for a while, his father

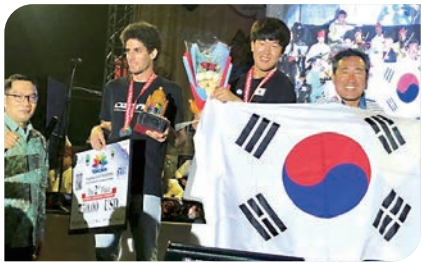

recently returned as a player. Furthermore, they both got selected to participate in next year's French Paragliding World Cup Superfinal, an event where only top-ranked players can enter. There, they are set to engage in a friendly yet competitive showdown as both mentors and rivals.

Chi-gwon's immediate goal is to win the Paragliding Asia-Oceania Championship held in Mungyeong City next spring. However, his passion doesn't end there. He aspires to rise to the top in the World Championships and defeat the European powerhouses, proudly carrying the national flag of South Korea while the national anthem resounds.

"I want to be a player who makes my country proud on the global stage. While South Korea ranks first in Asia in paragliding, there is still much room for improvement compared to European countries like France, Switzerland, Germany, and the United Kingdom. I aim to gain more experience on a larger stage, refine my skills, elevate the standard of paragliding in South Korea, and inspire many people to take an interest in this thrilling sport and participate in person," Chi-gwon expresses his aspirations.

# Hanseo Participates in Special Global Exchange Meeting

During the “6th South Chungcheong Province-China Provincial Government Exchange Meeting,” in which our university and nine local governments of China participated, discussions were held on cooperation in the field of higher education and ways to invigorate group tourism. The meeting took place from July 26 to July 27 at Lotte Resort Buyeo, and 35 officials from educational authorities and universities from nine regions in China, including Hebei, Heilongjiang, Jilin, Yunnan, Sichuan,

Thirty-five Chinese officials from 9 provincial governments who visited Hanseo University's Taeon Campus

Shanghai, Jiangsu, Qinghai, and Shandong, attended.

During the meeting, our university presented specific cooperation plans, and models of international exchange linked with the provincial government.

On the second day of the meeting, July 27, the 35-member Chinese delegation visited Hanseo University's Taeon Campus. They had the opportunity to tour aviation educational facilities such as the Flight Education Center, Aero Technical Education Center, and the Institute of Air Traffic Control Education. The visitors expressed their high expectations for new cooperative initiatives between both countries' higher education systems facilitated by our university.

# 56 Students from Kazakhstan Participate in Hanseo's "Global University Tour" Program

Fifty-six high school students recommended by ten high schools in Almaty, Kazakhstan's largest city, participated in our university's "Global University Tour" program.

On the morning of July 21, the students visited our main campus in Seosan and received a comprehensive introduction to Hanseo University from the officials of the International Cooperation Office. They then had a meeting with admission specialists for international students, where they received guidance on the direction of high school life based on the qualities our university seeks in

applicants. Through a Q&A session with the officials from the International Cooperation Office, they gained a better understanding of our university. Later, during a meeting with Kazakh students currently studying at our university, they received advice on preparing for studying abroad and living as international students.

In the afternoon, campus tours were conducted at our main campus and the Taeon Airfield Campus. The students carefully examined our university's educational facilities and infrastructure, and showed particular interest in the educational programs and facilities

Commemorative photo of Kazakh students visiting Hanseo University

of the School of Aeronautics Studies, School of Arts, and the Department of Hotel, Casino & Tourism.

As part of our efforts to select outstanding international students and promote talent

development, our university regularly offers Global University Tour programs. This edition of the program, where we joined Kazakh high school students, has been successfully concluded.

# Agreement with Uganda Civil Aviation Authority

Our university and the Uganda Civil Aviation Authority signed on June 2 a mutual cooperation agreement at Taeon Campus to foster the development of the aviation industry by both institutions.

During this event, marking the first official partnership between our university and the Uganda Civil Aviation Authority, attendees included Kim YeonMyung, Vice-President of Aeronautics, Jung HanSuk, Dean of the Hanseo International College of Aviation, Mr. Fred K. Bamwesigye, Director-General of the

Uganda Civil Aviation Authority, and Mr. J.W. Kabbs Twijuke, Uganda ICAO Ambassador. Through this agreement, both institutions pledged to collaborate on joint development programs in talent cultivation, academic exchanges, and technology development.

The cooperation will involve supporting Uganda's aviation workforce development through the utilization of Hanseo University's aviation education programs and infrastructure. Additionally, Hanseo University will provide technical and academic support to enhance Uganda's aviation industry competitiveness. Our

Kim YeonMyung, Vice-President of Aeronautics at Hanseo Univ., and Fred K. Bamwesigye, Director-General of the Uganda Civil Aviation Authority

university and the Uganda Civil Aviation Authority have decided to pursue a close cooperative relationship, aiming for this memorandum of understanding to become a solid foundation for the development of both countries' aviation industries, acting as the starting point for global exchanges in the aviation field.

# Business Cooperation Agreement with Seosan Sports Council

Hanseo University and the Seosan Sports Council signed a business agreement on August 8 to promote the development of human resources in the fields of recreational and professional sports.

In the signing ceremony held at the main conference room of Hanseo University, President Dr. Ham Ki-sun and Yoon Man-hyung, Chairman of the Seosan Sports Council, signed an agreement that focuses on the exchange of human resources such as faculty members and experts affiliated with both institutions for the development of personnel in the fields of recreational and professional sports; mutual support for on-the-job training utilizing the facilities and infrastructure of both

President Ham and Chairman Yoon of the Seosan Sports Council(front row) who signed the agreement

institutions; and joint development and operation of related programs.

Both institutions have decided to establish a practical working group separately to formulate specific

implementation strategies for the agreement.

During his welcoming remarks, President Dr. Ham said, “Hanseo University will supply integrated knowledge and glocal talent to the sports field of Seosan City, aiming to make Seosan a hub for the best recreational and professional sports in the country.” Chairman Yoon responded, “We will create a large number of jobs in the sports sector, fostering an environment where Hanseo University’s global talent can fully demonstrate their capabilities.”

Since 2020, under the local elected government, the Seosan Sports Council has been led by Chairman Yoon, heading the second term of the Seosan Sports Council composed of 39 member organizations as of 2023.

# Collaborative Agreement with Taean County Health Center

Our university and Taean County Health Center signed a cooperation agreement on July 19 in the meeting room of the center to better promote mental health improvement programs and crisis case management in the local community.

The main provisions of the agreement, which was signed by President Dr. Ham Ki-sun and Director Heo Jong-il of Taean County Health Center, include jointly promoting a social atmosphere of respecting life and suicide prevention education; mutual cooperation in education and promotion for early detection of mental health issues; collaboration on mental health counseling and in-depth assessments for high-risk groups; and mutual support for crisis case management of high-risk groups related to suicide prevention.

Both institutions have decided to establish a practical management system to ensure that these collaborative measures can be effectively implemented through an organic partnership.

President Dr. Ham (left) and Director Heo signing the collaborative agreement

# New Concept Welfare Hall “Imagination Study Café” Opens

A new student welfare space “Imagination Study Café” has been opened in the building on the right side of Ingok Hall. The opening ceremony, hosted by the HS Innovation Project Group on June 1, was attended by about 30 people, including President Ham and key officials.

The café, run without any human staff, is divided into an open space where students can study while enjoying more than 60 varieties of coffee and tea, and a closed space that accommodates group study in a café-like environment. The closed space also provides a space for using computers and laptops freely, as well as an area where videos of TED (Technology, Entertainment, Design) Talks, run by an American non-profit organization, are available in English, covering a wide range of topics from the latest scientific discoveries to international issues. The café opens from 9:30 am to 6 pm, but the opening hours may be adjusted based on the usage patterns of its users.
